WORK EXPERIENCE

- Data Virtuality Gmbh** 2021 - Present (Germany)
Senior Front End Developer - (Remote)
As a Senior Front-End Developer at Data Virtuality, my expertise extends to working with Angular, and I bring a wealth of experience in data visualization through the utilization of D3.js. In collaboration with UX/UI designers and cross-functional teams, I am dedicated to implementing and enhancing user interfaces that seamlessly integrate Angular components and leverage the power of D3.js for dynamic and engaging data visualizations. My role involves translating design concepts into practical and visually appealing web applications, ensuring optimal user experiences. Engaging in code reviews and collaborating with diverse teams, I contribute to the ongoing improvement of our products, emphasizing a high standard of code quality and performance. This position at Data Virtuality allows me to blend my proficiency in Angular and D3.js, providing innovative solutions in the realm of data integration and front-end development.
- IBpay** 2020 - 2021
Senior Front End Developer
As a Front-end Team lead, Implemented and designed projects based on the stock market and investment.
- Nicico** 2018 - 2020
Senior Front End Developer
As a Senior Front-End Developer at a prominent ERP development company, I specialize in Angular, contributing to the creation of responsive and scalable web interfaces for enterprise resource planning solutions. Working collaboratively within cross-functional teams. I contributed in various projects like Accounting, Sales, Marketing.
- Maxsa** 2017 - 2019
Front End Developer
As a Front-End Developer in a software startup specializing in online shop development for pharmacies, I played a vital role in integrating advanced technologies, including Angular, into our e-commerce solutions. As a Front-End Developer, I utilized my proficiency in Angular to enhance the functionality and interactivity of the online store interfaces. This involved collaborating closely with the development team to design and implement Angular-based features, ensuring a seamless and dynamic user experience for both pharmacy administrators and end-users.
- Fusoft** 2016 - 2018
FullStack Web Developer
As a Backend Developer, I have specialized in .NET Core, contributing to the creation of robust and scalable server-side applications. My proficiency in .NET Core extends to handling complex business logic and ensuring the seamless functionality of web applications.
