

SINA NASIRI

FRONT-END ARCHITECT | ANGULAR EXPERT

Tehran, Iran • +989303463993 • sinasiri1997@gmail.com

sinasiri.github.io

SUMMARY

Front-End Architect with 8+ years of experience designing and building scalable, high-performance web applications using Angular.

Specialized in enterprise-grade systems (ERP, financial platforms, data-intensive applications) with strong expertise in state management, micro-frontends, and performance optimization.

Proven track record of leading architecture decisions, improving system scalability, and delivering complex UI solutions such as data visualization and real-time systems.

WORK EXPERIENCE

Senior Front-End Developer

Code Clan (Remote) Sep 2024 – Present

- Architected a micro-frontend system using Module Federation, improving scalability and team independence
- Led adoption of modern Angular features (signals, zoneless architecture) to optimize performance
- Implemented Server-Side Rendering (SSR), improving initial load time and user experience
- Defined and enforced front-end architecture standards and best practices
- Built scalable UI systems using DevExpress, Ng-Zorro, and Tailwind CSS

Senior Front-End Developer

Data Virtuality GmbH (Remote - Germany) Sep 2020 – Sep 2024

- Implemented NgRx-based state management for a large-scale data platform with thousands of entities
- Designed scalable architecture using Container/Presenter pattern, improving maintainability
- Developed advanced data visualization tools (Data Lineage, Query Plan) using D3.js
- Extended Monaco Editor with dynamic IntelliSense across 1000+ database objects
- Improved performance using lazy loading and modular architecture, reducing initial load time

Senior Front-End Developer

IBPay (Tehran) Jan 2020 – Oct 2020

- Built real-time financial dashboards using WebSocket-based architecture
- Developed complex dynamic forms using Angular Reactive Forms
- Implemented flexible reporting and export systems for data analysis

Front-End Developer

NICICO (Tehran) Feb 2018 – Feb 2020

- Contributed to enterprise ERP systems across financial and reporting modules
- Developed reusable Angular libraries (form generator, reporting tools) used across projects
- Customized BPMN.js workflows and integrated them with backend services

Front-End Developer

Maxsa (Tehran) 2016 – 2018

- Developed e-commerce platforms for pharmacies
- Implemented dynamic UI features for admin and customer panels

Junior Front-End Developer

Fusoft 2015-2017

- Worked with AngularJS and early Angular versions
- Gained backend experience using .NET and Spring Boot

SKILLS

- Frontend Architecture: Angular, Module Federation, SSR, NX
- State Management: NgRx, RxJS, Signals
- Languages: TypeScript, JavaScript
- UI Libraries: Angular Material, DevExpress, Ng-Zorro, Tailwind
- Visualization: D3.js, BPMN.js
- Backend (Familiar): Spring Boot, .NET
- Tools: Git, Docker, Jira, Swagger, Figma
- Other: GraphQL

EDUCATION

B.Sc. Computer Engineering, Imam Khomeini International University
